

Read what matters. Pay for just that.

Pay-per-read journalism and podcasts, paid straight to the creator on Solana.

The problem

Great journalism is locked behind subscriptions nobody wants.

83%

of people don't pay for online news.

Reuters Institute, Digital News Report 2024: only 17% pay (20-country average).

1 story

is what most readers want, not a monthly contract.

Subscription fatigue: each paywall asks a one-time visitor for a long-term commitment.

€0.25

fixed card fee makes a €0.05 payment impossible.

e.g. Stripe standard EEA pricing: 1.5% + €0.25 per card payment.

Our solution

Pay per story. Straight to the creator.

€0.05

per story

€0.20

per podcast
episode

€0

subscription

100%

to the creator's
wallet

Every teaser is free. Readers unlock only what they really want to read or hear.

How it works

One click. Three seconds. Verified on-chain.

1

Connect a wallet

Phantom, or the built-in Demo Wallet. No card, no bank account.

2

Pay €0.05

A Solana transfer from reader to writer, with a memo: "payperread:<story>".

3

Server verifies

Our server checks the transaction on the blockchain before it unlocks anything.

4

Yours to keep

Saved in the library, readable offline, restorable from the wallet any time.

See it in action.

Read what matters. Pay for just that.

Solana Devnet prototype · github.com/marcelpfitzer/SolanaCaseBMT2026

For readers

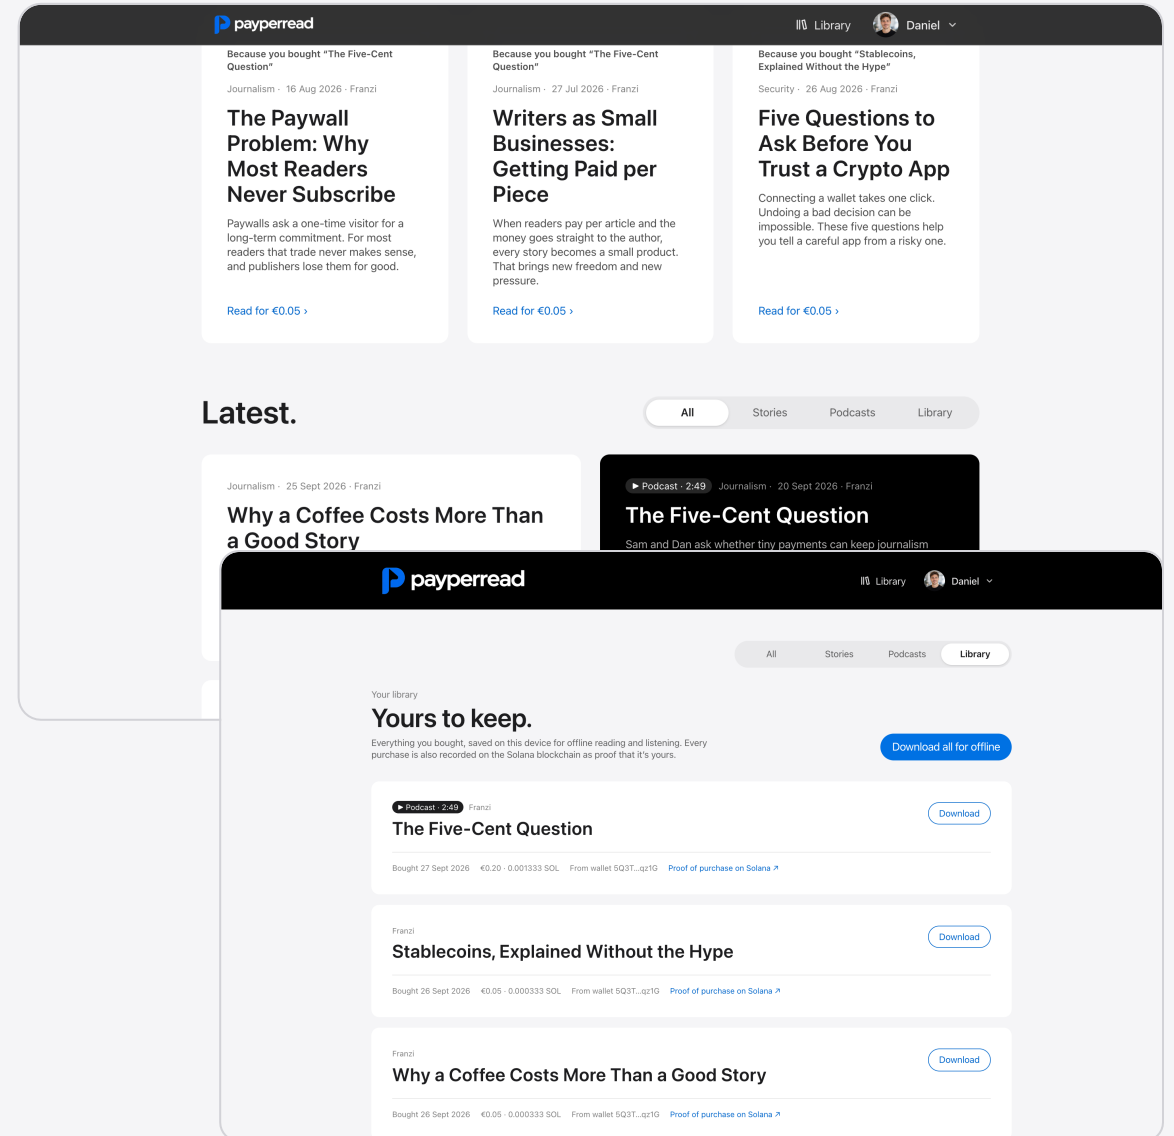

Discover. Pay once. Keep it forever.

Personal picks based on the topics you bought

Stories and podcasts in one place, filter in one tap

Library with offline mode read and listen without internet

Proof of ownership restore purchases from your wallet

For creators

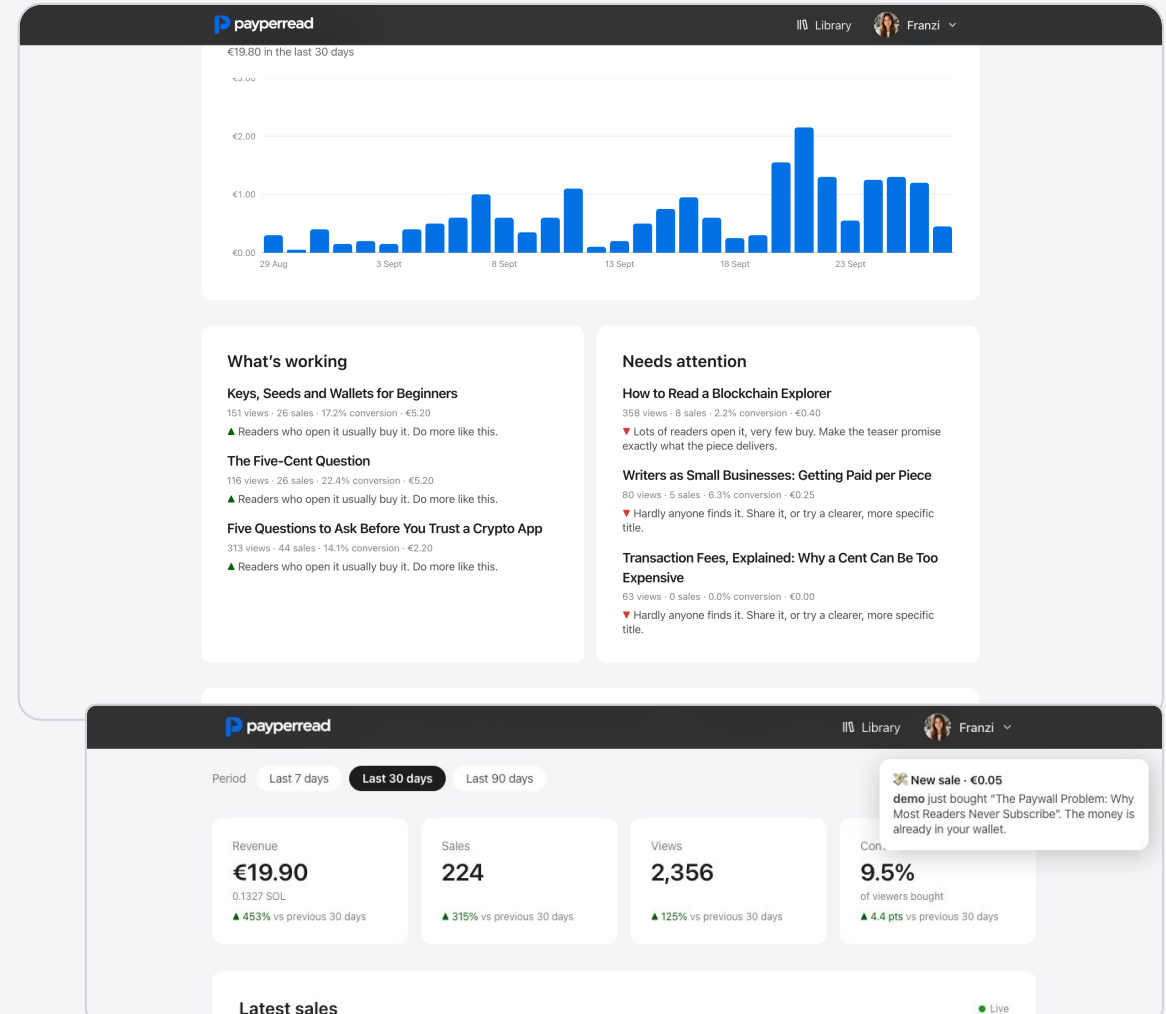

Know what works. See every sale live.

Revenue, sales, views, conversion per 7,
30, 90 days

What's working / needs attention with
concrete tips

Live sales the money is already in the
wallet

Curated authors every writer applies and
is reviewed

Why Solana, why now

Micropayments finally work.

< €0.001

**network fee per
payment**

5,000 lamports base fee. The
€0.05 reaches the writer almost in
full.

Seconds

from click to unlocked

Fast confirmation: reading
continues right away.

On-chain

**receipt for every
purchase**

A memo “payperread:<id>” proves
ownership, even if our database is
lost.

Business model (proposed)

We earn when creators earn.

Every €0.05 story

€0.045 to the creator

€0.005 platform fee (10%)

Split on-chain in the same transaction: no payout delays.

Newsroom plan

White-label paywall widget for existing news sites

Analytics and live sales for editors

Monthly SaaS fee + reduced platform fee

Who it's for

Two sides, one missing link.

Creators

- Independent journalists and newsletter writers
- Local and regional newsrooms
- Podcasters with premium episodes

Readers

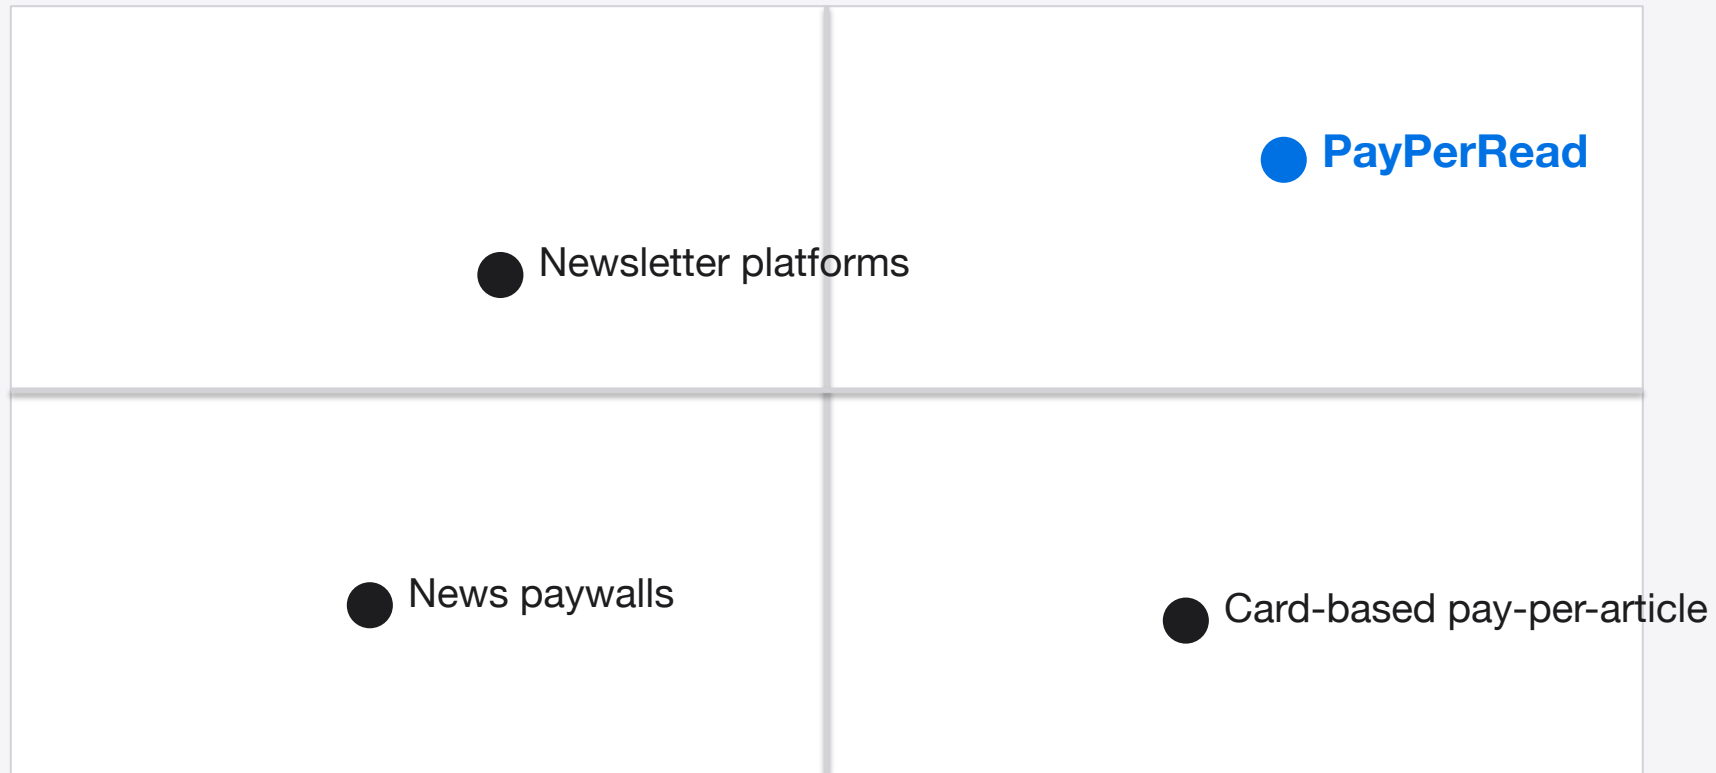

- The 83% who don't subscribe to news
- Occasional readers arriving from social and search
- Crypto-native users who already hold a wallet

Competition

The only one per story and direct to the creator.

Direct to creator

Platform holds
the money

Subscription

Pay per story

Status

A working product, not a mock-up.

✓ **Real on-chain payments**

verified by our server before unlocking

✓ **12 stories, 3 podcasts**

with free teasers and paid full content

✓ **Readers, authors, admins**

author applications with editorial review

✓ **Creator analytics**

KPIs, insights, live sales

✓ **Offline library**

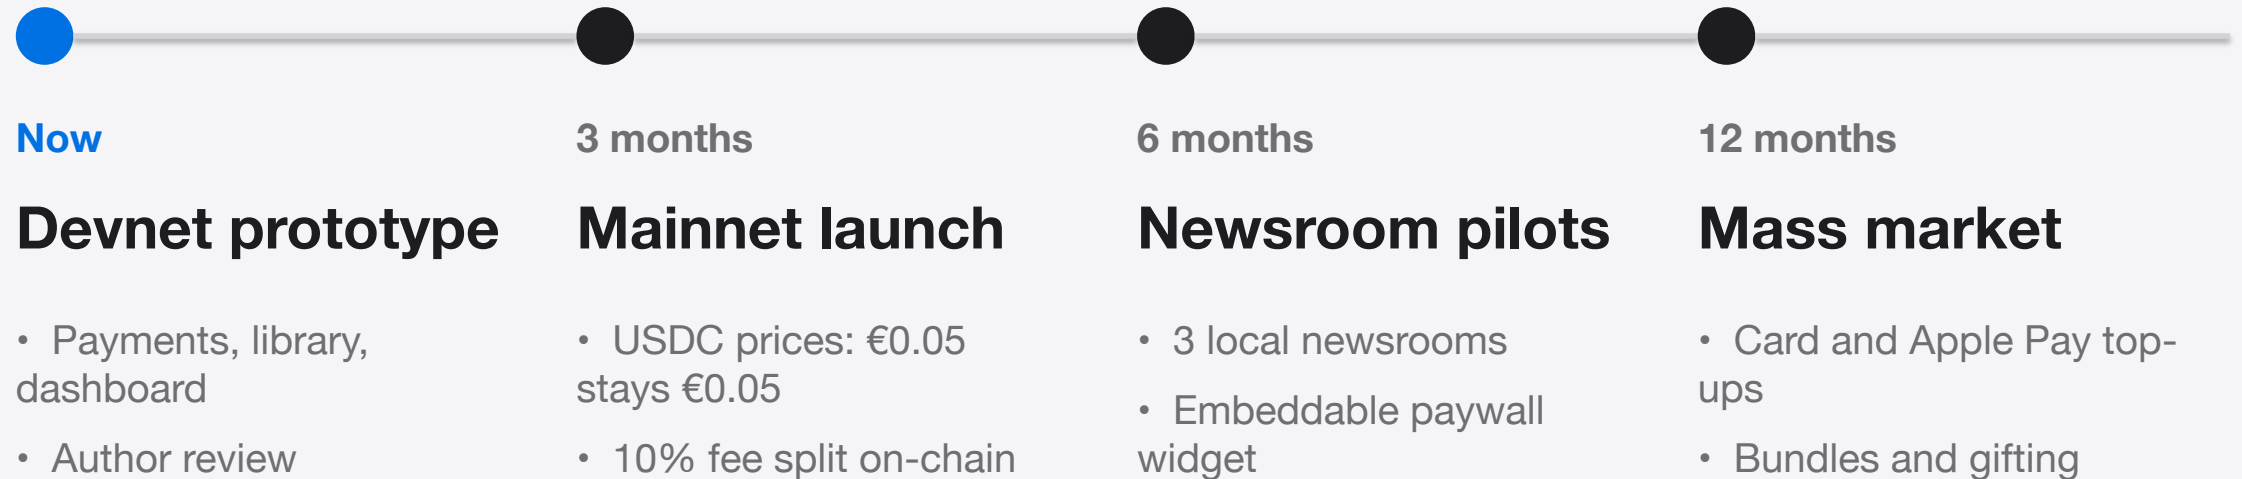

installable web app (PWA)

✓ **Restore from wallet**

ownership lives on the blockchain

Roadmap

From prototype to paying readers.

Team

One founder, end to end.

Marcel Pfitzer

Founder · product, design and engineering

Built solo

- ✓ Product idea and business model
- ✓ UX and visual design
- ✓ Full-stack web app (Next.js, SQLite)
- ✓ Solana payments and on-chain verification
- ✓ Creator analytics, live sales, demo and pitch

Read what matters. Pay for just that.

We're looking for

- Newsrooms and creators for a pilot
- Mentoring on go-to-market
- A partner for the Mainnet launch
